PLANS AND PROGRAMS STAFF WEEKLY REPORT FOR
PERIOD ENDING 2 MARCH 1983

1. <u>Progress Report on Tasks Assigned by the DCI/DDCI</u>:

No tasks assigned during this reporting period.

2. <u>Items or Events of Major Interest that have Occurred
During the Preceding Week</u>:

a. <u>LIMS</u>

1. P&PS continues to review internal policy approvals
with SDG analysts, in terms of their incorporation within modules.
Several of these LI and SI based approvals appear to be subject
to challenge versus the LIMS way of doing business in 1985 and
beyond.

2. P&PS and OF will undertake informal module
reviews, beginning with the catalog module today. This will
provide Plans Staff members insight into the content of The
Detailed System Requirements Document and prepare OL/OF for a
later formal review of LIMS requirements.

STAT
STAT

3. In the D/L Staff meeting of 25 February, [ ]
[ ] presented an overview of the Data Administration func-
tion concept, now being developed in P&PS. This function will
become a key factor in LIMS' implementation and operational
management. (U)

b. <u>Regulation Revisions</u>

The following regulations were reviewed, commented upon,
concurred in, or published during the past week:

STAT

[ ] Assignment - Concurred
Contract Personnel - Concurred (U)

c. <u>Training</u>

STAT

[ ] attended the PCMD training at Ames
Building 28 February - 1 March.

STAT

[ ] attended the GIMS II training at
CofC 28 February - 1 March. (U)

d. <u>General Items</u>

STAT

P&PS officially welcomed [ ] to its ranks
28 February. John formerly headed the Agency copier management
program from within the Plans, Programs and Systems Staff of
Printing and Photography Division. John will initially work
on special P&PS studies, surveys and planning projects. (U)

STAT

Systems Analysis Branch/P&PS/OL
WEEKLY STATUS REPORT
Week of 21 to 25 February 1983

I.   Major Activities During the Past Week:

A. Support to OL:

ICS (Inventory Control System). The review meeting for the
GAS Enhancement Project scheduled for Friday, February 25, was
canceled and will be re-scheduled for next week when OF, OL, and
ODP have had sufficient time to review the problems with the ICS
to GAS interface. [   ] (U)

STAT

AWCS (Automated Weapons Control System). Modifications were
made to the JCL and programs used to dump the NIPS data base for
weapons to tape for creation of microfiche. These changes cleared
up the problems encountered by the Data Control Branch, SD/OL.
[   ] (U)

STAT

AVRS (Agency Vehicles Records System). Personnel in the
Operations Support Branch, SD/OL, encountered several problems in
attempting to update the current data base for vehicles. The data
base has been successfully restored and updated. [   ] (U)

STAT

INFO (INFO Applications).
SAFE (Safe Inventory System). A file was damaged
while sorting records for a report when the minidisk
ran out of space. We had the minidisk increased in
size and restored the file.   The other alternative
was to have ODP restore it; however, they backup the
minidisks each Friday and in this case three days of
data would have been lost. [   ] (U)

STAT

REALESTATE (Realestate System). The RAMIS data base minidisk
was written to a tape file. We do this quarterly to be able to
restore the minidisk in a timely manner if it becomes damaged.
[   ] (U)

STAT

AIM (Automated Information Management). We continue to add
OL users to the AIM system. [   ](U)

STAT

II.   General Items:

None to report.

III. Problems:

A. Support to OL:

AVRS (Agency Vehicles Records System). Personnel in Operations Support Branch, SD/OL, are encountering increasing difficulties with the updating and general use of the NIPS data base for vehicles. Any major changes/enhancements to this system were tabled due to lack of available NIPS expertise as well as due to the fact that the vehicles system was scheduled to be replaced in the near future by ASAPS (Agency Standard Automated Property System). Unfortunately, the ASAPS module that was designed and readily available did not fulfill their requirements. This situation is being studied. (U)

STAT

INFO (INFO Applications). Status of the INFO System: We still do not have the new version of the INFO system installed on VM1. DDO/IMS personnel are still having problems with the tape they received from the HENCO company. (U)

STAT

FARS (Federal Automated Requisitioning System). Personnel in the Interdepartmental Support Branch, SD/OL, are in the process of retiring records from their major files to reduce the file sizes to a more manageable level for processing and backup procedures. The retirement of records should clear up the backup problems that this office has been encountering. (U)

STAT

IV. Upcoming Events:

None to report.
